

Economics for Non-Economists

Course Syllabus

CEDA's micro-learning courses develop critical thinking, build leadership acumen and knowledge in areas such as public policy, economics and ESG – ready for application in an increasingly competitive business environment.

In this course, you'll engage with issues that feature prominently in media headlines every day. You will become better equipped to understand the issues that matter to you and your organisation – from employment to cost of living, and all the other macroeconomic trends that impact our lives.

Andrew Barker

Senior Economist, CEDA

Senior Economist (QLD) at CEDA based in Brisbane. Andrew was previously a Senior Economist and Head of Desk in the OECD economics department, focusing on climate, labour market, productivity and housing policy. As a Research Manager at the Productivity Commission he led quantitative work on water, gas and labour markets and contributed to public inquiries on infrastructure access, automotive manufacturing, service exports and the economic effects of migration.

UPON COMPLETION

Learning outcomes

Upon completion, you will have a working knowledge and understanding of:

Language and principles of economics

Impacts of economy on public policy

Graphs and economics formulas

GDP and market systems

Marginal costs and benefits

Business cycles and economic performance

Governments' role in fiscal and monetary policy

Economic data, forecasting and modelling

Domestic and global economy

To share your awards you will need to create a free account at Badgr. We will provide a detailed explanation on how to include the badge on your profile.

Showcasing your learning achievements is important for your professional development

Share your new skills with your network by adding your CEDA Learning digital credential to your LinkedIn profile on completion of the course.

What people are saying

I've worked in the public sector, across several agencies, for over 25 years. During this time, I have had several touch points with economic concepts without any real understanding of the broader economics framework. This online course filled in those gaps for me in a way that sustained my interest and allowed me to incorporate the learning into my existing workload. While going through the course, I had many 'aha' moments which cumulated in solid foundation in economics concepts."

Anne Finlay

Manager Coordination
WA Department of Primary Industries
& Regional Development

Course structure

Intro

Introduction to scarcity, datasets and graphs

Module 1

Thinking like an economist

Module 2

Demand, supply and equilibrium in markets

Module 3

Macroeconomics and the GDP formula

Module 4

Inflation and unemployment

Module 5

Market failures

Module 6

Fiscal and monetary policy

Economic forecasting and modelling

Module 8

Australia's domestic economy and its position in the global economy

Each module

- ✓ New content becomes available as you complete each module.
- ✓ Complete lessons and modules at your own pace.
- ✓ Your progress will be automatically saved as you progress.
- ✓ Test your understanding at the end of each module with a quiz.
- ✓ You can ask for help from the course instructors at any time through the chat box.

About CEDA

CEDA – the Committee for Economic Development of Australia – is an independent, membership-based think tank.

CEDA's purpose is to improve the lives of Australians by enabling a dynamic economy and vibrant society. Through independent research and frank debate, we influence policy and collaborate to disrupt for good, and are currently focused on tackling five critical issues:

- 1 More Australian businesses and sectors at the forefront of global productivity
- 2 Australia to be a leading economy in decarbonisation and climate adaptation
- 3 Greater economic and social participation by all Australians
- 4 World class and sustainable human services
- 5 Australia to be a top performer in the use of data, digital and emerging technologies

CEDA Learning

CEDA Learning provides high-quality education that develops critical thinking

It help builds practical skills ready for application in an increasingly competitive business environment. Our range of courses and programs suit a variety of interests and goals.
